

Week 2 - Due this week

Required Reading

- **[Bioinformatics in Tropical Disease Research: A Practical and Case-Study Approach](http://www.ncbi.nlm.nih.gov/books/NBK6828/)** (<http://www.ncbi.nlm.nih.gov/books/NBK6828/>) .

In particular read section 2: *Data Modeling Using the Entity-Relationship Model*

Ferreira, J. E., and Takai, O. K. (2007). *Chapter A02 - Understanding Database Design*. National Center for Ciotecnology Information. Retrieved from <https://www.ncbi.nlm.nih.gov/books/NBK6828/> (<https://www.ncbi.nlm.nih.gov/books/NBK6828/>)

Recommend Reading and Video

Chapters 3 & 4 - These chapters go over design, entities and relationships. They talk some about schemas which is a topic for next week, but it should not distract too much from this week's content.

Justin Wolford illustrates the process he uses for modeling a simple situation with ER diagrams in the following video:
